DETAILED ACTION

1. This office action is in response to the application filed on 11/1/2001.
2. Claim 1 is pending.

Specification

3. The abstract of the disclosure is objected to because it is longer than 150 words.

Correction is required. See MPEP § 608.01(b).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,370,681. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the instant application is a computer implemented method version of the computer system claim 1 of the U.S. Patent 6,370,681. It would have been obvious to one having ordinary

Art Unit: 2122

skill in the art to implement the system claim in a method claim because one would want to utilize the method to generate computer code automatically.

Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter: the cited prior arts taken alone or in combination fail to disclose, in combination with other claimed limitations, identifying at least one associated computer program for each activity and dependency for implementing the activity or managing the dependency, wherein the representation is defined by activities, dependencies, and ports through which activities are connected to dependencies as recited claim 1.
